DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone call with Attorney Robert Mueller on 3/6/09.

Claim 44 will read as follows:

An extendible exhaust nozzle bell for a
rocket engine of an aircraft or spacecraft, comprising:
a first part and a second part, wherein said first part, which has a smaller
diameter than said second part, is fixedly arranged on a motor of the rocket
engine and said second part is arranged in a flexible manner with respect to the
first part, such that, in a front stowed position, said second part is located to
surround said first part and, in a rear operating position, is located to continue the
first part;
a closed volume acted on by a gaseous fluid, which, when acted on by the
gaseous fluid by enlargement of the volume, said first and second parts are
structured and arranged to extend said second part from said front stowed
position into said rear operating position; and

said closed volume being formed at least in part by a deformable rolling bellows arrangement arranged to an exterior of the first and second parts ~~at least when the second part is located~~ in the rear operating position.

Claim 46 will read as follows:

An extendible exhaust nozzle bell for a rocket engine of an aircraft or spacecraft, comprising:
a first part and a second part, wherein said first part, which has a smaller diameter than said second part, is fixedly arranged on a motor of the rocket engine and said second part is arranged, such that, in a front stowed position, said second part surrounds said first part and, in a rear operating position, said second part continues the first part; and
a closed volume, formed at least in part by a deformable rolling bellows arrangement that is structured and arranged to move the second part from the front stowed position to the rear operating position,
wherein the deformable rolling bellows arrangement, in at least the rear operating position, is arranged to an exterior of the first and second parts.

Allowable Subject Matter

1. Claims 20-49 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach a bellows arrangement that forms a part of the closed volume that is also connected to an external surface, or is located to an exterior of the first and second parts. The "bellows" of Carey (section 15, Fig 1) forms a part of the volume, but is not connected to an external surface or outside of the first and second parts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
